

Exam topics

1. Source of forest reproductive material
2. Certification of sources of reproductive material
3. Collection of seed material
4. Processing of seed material
5. Storage of seeds
6. Pre-sowing treatment of woody species
7. Seed-production control
8. Planting stock division
9. Evaluation of planting stock morphological and physiological quality
10. Types of forest nurseries, establishment of nurseries on forest and non-forest soil
11. Preparation of soil in forest nurseries for bare-rooted planting stock cultivation
12. Cultivation of bare-rooted planting stock
13. Cultivation of containerized planting stock
14. Types of containers, root system deformations
15. Lifting of planting stock
16. Handling with planting stock
17. Storage of planting stock
18. Forest regeneration with sowing
19. Forest regeneration with planting
20. Establishment of woody species mixture
21. Reforestation of sandy soils
22. Reforestation of waterlogged localities
23. Reforestation in mountain and alpine elevations
24. Reforestation of localities with strong weed infestation
25. Reforestation of frost influenced localities
26. Afforestation of agricultural lands
27. Afforestation of disaster areas
